

# American International Medical University (AIMU)

American International Medical University (AIMU) College of Medicine and Nursing is an innovative school dedicated to providing a learner-centric education of the highest quality, granting opportunities to underrepresented minorities, fostering a diverse academic community, and ensuring that its graduates develop the skills and attitudes of life-long learning, compassion, and professionalism. We also provide students who would otherwise be unable to receive a medical and nursing education with the tools to become successful physicians and nurses.

AIMU was founded with the commitment to support underserved communities and address the impending physician and nurse's shortage with an emphasis on primary care. As such, the University recognizes its social responsibility to advance the field of medicine, nursing and lead the next generation of physicians and healthcare professionals to respond to global health care needs. In nine short years, we have reached some impressive milestones. Imagine what we can accomplish in the next ten.

At AIMU, our mission is to prepare highly dedicated students to become effective, successful Physicians & Nurses by focusing on imparting the knowledge, skills, and values required for our students to establish a successful path in their career.

## **AIMU is accredited by:**

The Ministry of Education, Saint Lucia

AIMU's curriculum and academic programs are prepared and monitored by Members / Specialists of Medical Councils, including Medical School Accreditation Approval and Monitoring Committee, ECFMG, and the Medical Council of India.

We are also widely listed and recognized by many organizations including:

- ECFMG (listed with FAIMER's IMED)
- World Health Organization
- Medical Council of India
- Medical Council of Canada

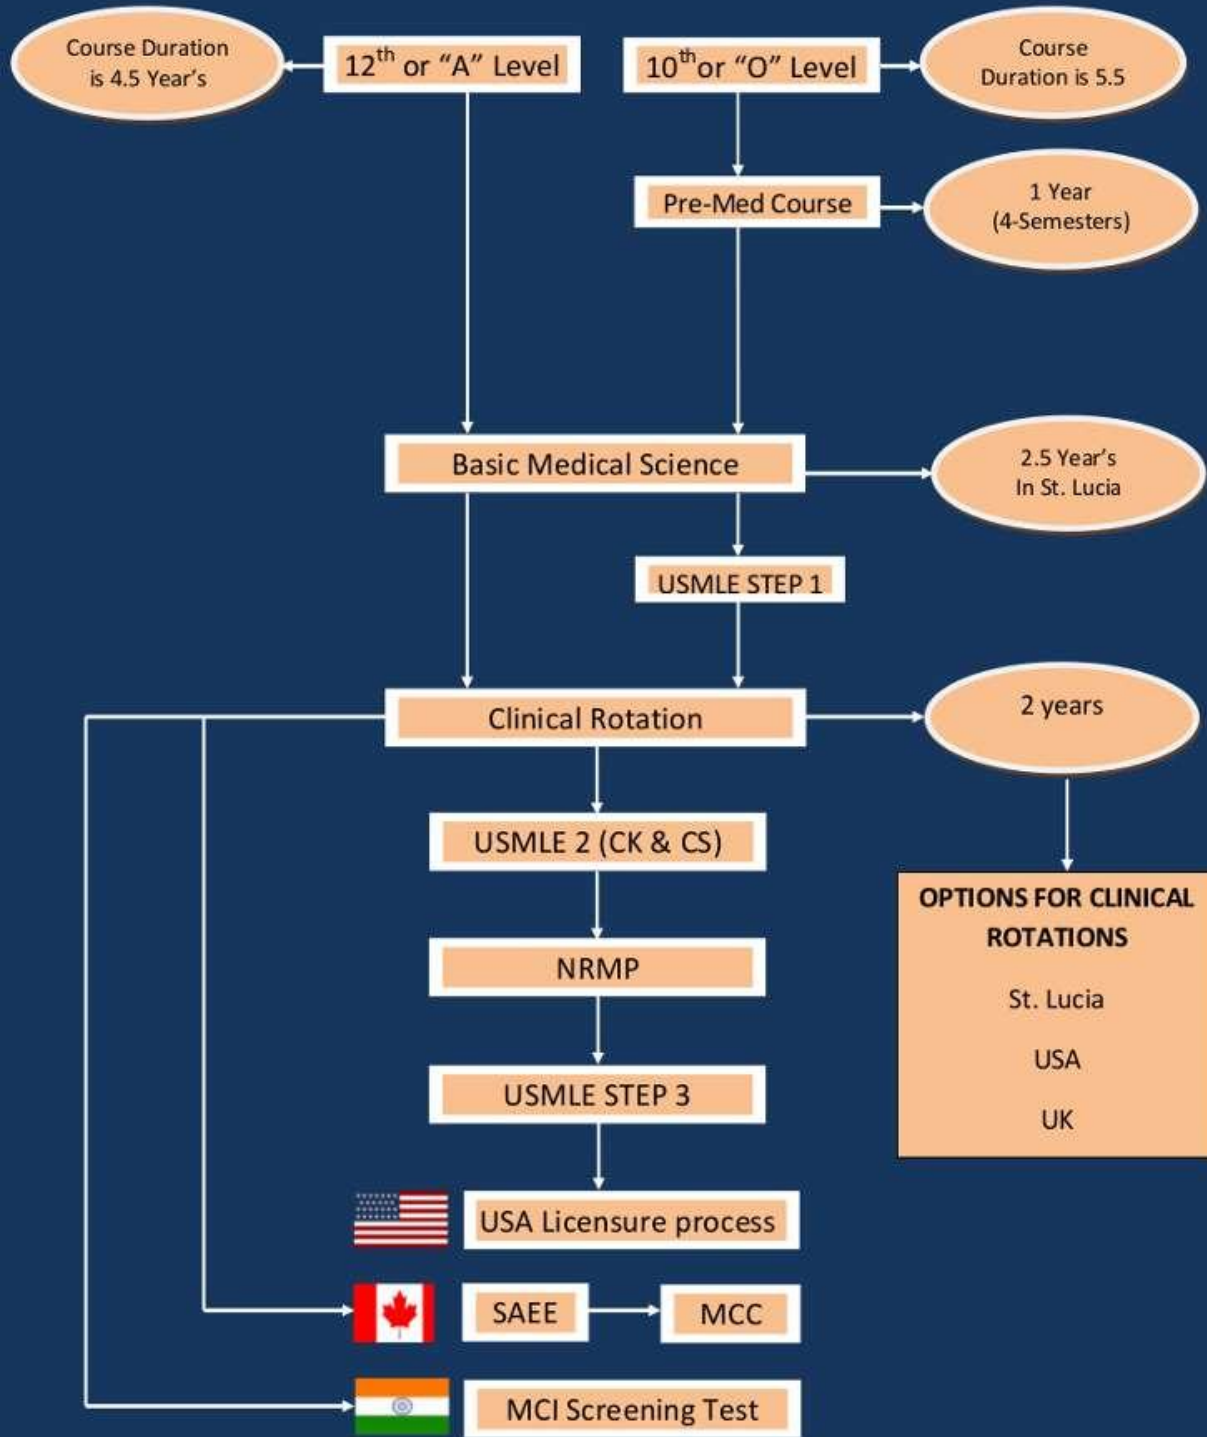

AIMU offers a unique program that enables you to practice as a physician in the United States of America. The first 5 semesters are conducted in Saint Lucia. You have the option of taking your 5th semester in Takoma Park, Maryland.

Once the basic science portion has been completed the student is eligible to take Step 1 of the United States Medical Licensing Exam. On successful completion of Basic Science Program, the student is allowed to continue his education in any of the affiliated hospitals in the United States. After completing 72 weeks of clinical rotations, the student will be awarded a Doctor of Medicine degree. Following completion of Step 2 CK and CS the new physician is eligible for residency in the United States.

### **Location**

The candidate may undertake the research as an internal student at AIMU campus or its associated institutions including teaching hospital, other research facilities, or as an external student not in attendance at the University campus except for periods as may be prescribed by the Committee. The approved applicant may undertake their enrollment with a full-time or part-time course at the University; the Committee may permit a candidate to spend a period in the field, within another institution or elsewhere away from the University if it is satisfied that this is necessary to the research program and provided that the work can be supervised in a manner satisfactory to the Committee. If the candidate's research work is based externally, there must be a minimum acceptable level of supervision that will be determined by the Committee. Normally an external candidate within another organization or institution will have a co-supervisor at that institution.
